SHAKTI SWAROOP NAYAK

s.ssn.1458@gmail.com | +91 9777389659 | GitHub: @shaktissn
Portfolio: https://shaktissn.github.io/Portfolio/
Computer Science and Engineering Student | Software Development

PROFESSIONAL SUMMARY

Computer Science and Engineering student with project and internship experience in front-end web development, Python-based AI/ML, and cloud technologies. Skilled in Java, Python, C, JavaScript, React, Flask, Django, MySQL, Git, and REST API integration. Interested in building responsive web applications and practical software solutions.

TECHNICAL SKILLS

Programming: Java, Python, C, JavaScript
Web: HTML, CSS, JavaScript, React
Frameworks / Database: Flask, Django, MySQL
Tools / Concepts: Git, GitHub, Data Structures and Algorithms (DSA), REST APIs
AI/ML / Cloud: AI/ML fundamentals, IBM Cloud, IBM SkillsBuild

EDUCATION

B.Tech. — Computer Science and Engineering | Government College of Engineering, Keonjhar | **CGPA: 8.19**
Class XII (CHSE, Odisha) — 2024 | Gayatri Residential Higher Secondary School, Keonjhar | **76.5%**
Class X (ICSE) — 2022 | Nirmala Convent School, Keonjhar | **89.5%**

INTERNSHIP EXPERIENCE

AI and IBM Cloud Technologies Intern — Edunet Foundation, in collaboration with IBM
• Explored AI/ML concepts, Python-based model development, and IBM Cloud through a 4–6 week virtual internship.
• Applied AI/ML techniques to real-world problem statements and explored cloud deployment using IBM Cloud.
Front-End Web Development Intern — Edunet Foundation, in collaboration with AICTE
• Built and deployed responsive web pages using HTML, CSS, JavaScript, and modern front-end practices.
• Practiced Git version control, debugging, usability, and UI/UX principles during a 6-week internship.

ACADEMIC PROJECTS

Power System Fault Detection and Classification | *AI/ML, Python, IBM Cloud*
• Developed a classification approach using three-phase voltage and current data to identify normal operation and common power-system faults.
• Explored IBM Cloud deployment for remote access and cloud-based fault-data analysis.
Weather Forecast Web Application | *HTML, CSS, JavaScript, REST API*
• Built a responsive, mobile-first weather app with real-time weather data for a searched city or user location.
• Implemented asynchronous API requests, JSON processing, response handling, and dynamic DOM updates.

TRAINING

Core Java Industrial Training — Central Tool Room & Training Centre (CTTC), Bhubaneswar | July 2026
• Covered Java SE and object-oriented programming, including classes, objects, inheritance, and packages.
• Studied exception handling, multithreading, strings, I/O and file handling, AWT, JDBC, and socket programming.

CERTIFICATIONS

Getting Started with Artificial Intelligence (IBM); Python Essentials 1 (Cisco); Python for Beginners: Data Structures (Coursera); Artificial Intelligence (Accenture); Python (Basic) and Problem Solving (Basic) (HackerRank); Python for Data Science (IBM); Programming in C (Infosys Springboard).
